Promise to Our Planet celebrates our shared progress on climate action and recommits us as a community to advancing climate solutions.

Join us as we celebrate 55 years of providing local solutions for a healthy planet. In the face of daunting environmental challenges, Acterra has continued to use a science-based approach to instill hope while building community. This year's event will bring together local and national climate activists, sustainability leaders and long-time partners who have played a significant role in Acterra's 55 year history. We are excited to feature a fully sustainable menu prepared by local chefs, private tours of the property and Keynote Speaker - Rob Jackson, author of Into the Clear Blue Sky, named Top Science Book of 2024 by The Times.
